Title: Historical Presentations

Procedures: You can work with **ONE** other person on this project or you can choose to work alone. You will be assigned one of the historical figures listed below. Your Presentation must include the following:

- 1) Explain who he/she is in your own words.
- 2) Tell when, why, what, and how the person is important to geology.
- 3) List three facts about the person- in your own words- that explains your person
- Write a question that if answered correctly would show the other students understood your presentation.
- 5) A bibliography showing where you got your information from.

Technologies that will be researched:

- 1. Alfred Wegner
- 3. Charles Walcott
- 5. Nicloas Steno
- 7. Andrija Mohorovicic
- 9. Harry Hess
- 11. James Dana

James Hutton
Charles Lyell
Abraham Werner
Aristotle

2. William Smith

12. Lord Kelvin

Write your assigned person here _____

- 1) Explain who he/she is in your own words.
- 2) Tell when, why, what, and how the person is important to geology.
- 3) List three facts about the person- in your own words- that explains your person
- •
- •
- •
- 4) Write a question that if answered correctly would show the other students understood your presentation.
- 5) A bibliography showing where you got your information from. You must use at least 2 sources. (see back side).

How to complete your bibliography:

For each source you used, write retrieved from: then copy and paste the web address onto your bibliography. Then put the date you received the information. Below is an example.

Example: Retrieved from: <u>http://library.thinkquest.org/19012/begin.htm</u> on Sept. 19, 2006.

EXTRA CREDIT (2 points): Geology is often thought of a historical and guessing science. Why is that?

Is the question above something science alone can answer?
